

dinsdale moorland services limited

Restoring Nature's Balance

Dinsdale Moorland Services Limited (DMS) is a progressive, innovative company that specialises in contracting in sensitive, remote and difficult terrains. Where other contractors may lack the specialist knowledge or capability, DMS thrives on tackling complex problems and delivering unique project solutions in some of the most environmentally challenging locations in the UK.

Our portfolio of experience is diverse - from moorland restoration, wetland creation and forestry works; to innovative public rights of way improvements, GPS mapping and consultancy services. In all these areas, and more, we are fully equipped and able to provide a single source for all your requirements, from project conception to completion.

DMS prides itself on working to achieve the best aesthetic and environmental results possible. We use quality, locally sourced materials and native plant seed mixtures, indigenous to the area. Where project demands warrant their use, modern materials such as plastics and concrete are employed, but these are carefully hidden so that a natural façade will always prevail. Much of the plant and equipment we use has been specially modified by our own team of highly skilled engineers in order to improve efficiency and reduce environmental impact when engaged in construction or restoration works in sensitive habitats or in areas of outstanding natural beauty.

Our reputation and continued growth is underpinned by a positive, 'can do' attitude, the ability to excel at team working and the capability to provide the specialist skills, knowledge and services necessary to complete often complex tasks, to the highest of standards.

We look forward to being of service to you in the near future.

Habitat Restoration & Management

We engage in a wide variety of habitat regeneration and management projects; from bare peatland reinstatement, grip blocking, gully re-profiling and control of invasive species to the restoration of lowland mire and creation of wetland nature reserves.

Areas of expertise:

- Heather management & re-seeding
- Bracken & rush control
- Environmental reinstatement & ground repair
- Grip blocking, gully & edge re-profiling
- Bare peat restoration
- Lowland mire restoration
- Blanket bog restoration
- Environmental translocation

Infrastructure Services

Working across the UK in a wide variety of fields, we have the ability, experience and expertise to provide infrastructure from moorland footpaths to access roads within wind farms.

Areas of expertise:

- Public footpaths, tracks & bridleways
- Private estate access routes & forest roads
- Public & private metalled roads
- Fords, footbridges & vehicular bridges
- Walls, gates, stiles & fencing
- Shooting butts, boardwalks & bird hides
- Civil engineering in sensitive locations including SSSIs (Sites of Special Scientific Interest), National Parks and Nature Reserves

Surveying & Consultancy Services

We offer a comprehensive GPS surveying & mapping package in addition to a host of other consultancy services including Habitat Surveys, Ecological Impact Assessments and Environment Agency Licence Applications.

Areas of expertise:

- Ecological Impact Assessments
- Hydrological surveys
- GIS digital mapping
- Landowner negotiations
- Environment Agency Consents
- Estate management plans
- Design services

Mountain Bike Trail Design & Build

Family-friendly route, fast flowing single track or the ultimate downhill experience we can design and build a sustainable trail of your choice.

Areas of expertise:

- Design & planning of all access trails
- Production of detailed reports/route maps
- Ecological & archaeological assessments
- Technical specifications for tendering purposes
- Submission of application to funding bodies
- Design & build of graded trails (Green, Blue, Red & Black)
- Design & build of Skills Areas
- Design & build of Pump Tracks

Accreditations

Committed to ongoing staff training, safe working practices and continual service level improvement DMS actively searches for ways to reinforce and build upon its already high standards. To this end the company holds a number of nationally recognised accreditations.

UVDB - Achilles

Achilles operates the Utilities Vendor Database (UVDB) supplier management service on behalf of all the major UK utility organisations. Established in 1996 UVDB is now recognised as the standard approach to supplier pre-qualification within the UK utilities sector. As a Registered Supplier under the UVDB Verify audit and assessment service DMS is able to demonstrate its compliance with current health, safety, environment and quality requirements.

CHAS - Contractors Health & Safety Assessment Scheme

As an Accredited Contractor under this scheme DMS must meet rigorous standards of health and safety compliance. CHAS is established as the UK market leader for health and safety pre-qualification.

Investors in People

Achieving the Investors in People Standard in 2010 DMS is committed to continuous business improvement through its personnel.

ISO Certification

DMS is fully compliant with ISO9001:2008 Quality Management Standard; ISO14001:2004 Environmental Management Standard; and BS OHSAS 18001:2007 Occupational Health & Safety Management Standard.

Construction Design & Management Regulations (2007)

DMS is experienced in all aspects of contract administration, including certification and dispute resolution and will ensure that it fulfils its requirements of the CDM Regulations in respect of the designer's responsibilities. DMS is able, if required, to provide the services of a suitably qualified CDM co-ordinator.

Constructionline

Constructionline is a national online database and is the UK's largest register for pre-qualified contractors and consultants. In terms of efficiency, best practice and time and cost saving, it is proven to deliver for public and private sector organisations alike. The Constructionline service is recommended by the OGC Common Minimum Standards and The Local Government Task Force.

DMS has a diverse portfolio of clients including public sector bodies, local authorities, utilities companies, charitable organisations and private sector estate and land owners.
